VISCA DOORS

VD-PSS

PUSH UP ROLLER SHUTTER

VD & PSS Push Up Roller Shutter Door

Specification: -
The Door is designed & tested in accordance with:

BS EN 12604:2017+A1:2020

Vertical mild steel angles and/or box sections are supplied to support the entire door. These are bolted to the door aperture and suitably sized mild steel endplates are fitted to the top of each vertical support, to support the roller barrel assembly. This assembly contains a helically wound spring, designed to perfectly balance the shutter curtain.

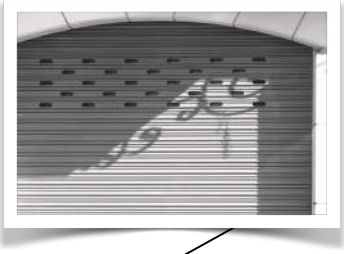

The AGS-PS Shutter is for smaller opening sizes, where as the AGS-PSS Shutter is provided with an anti-fallback safety brake fitted to the barrel assembly to prevent uncontrolled dropping of the shutter curtain. and is produced to cover openings up to 2.8m wide and 2.5m high.

The shutter curtain can be constructed from a variety of materials to give the required appearance, and runs in galvanised steel side channels, mounted to the vertical angle/box. The depth of the channel will be dependent on the door size.

All mild steel components are finished in one coat of primer. Polyester Powder finish (to BS3900 F2 & F7) is available on request to any standard colour within the BS 4800 or RAL range (Colour subject to availability at time of order & extra costs will apply).

There are a variety of locking methods that can be used, with Guide Locks fitted as the standard option.

If you are looking for a high level of protection for smaller door openings and windows, the AGS-PS & AGS-PSS is an economical choice.

They can be installed internally or externally and each one is designed to fit the opening perfectly.
